Number of clients screened for adherence Number of screened clients are counseled	Number of clients Number of screened clients		100% of clients are screened for medication adherence 80% of clients screened to have adherence issues are counseled.
Prescriptions are in to pharmacy within 48 hours of ADAP Assistance provider receipt of prescription	Clients are provided medication within 48 hours of prescription given to ADAP Assistance provider	Number of clients with prescription provided within 48 hours	Number of clients with prescriptions	Client chart	Clients are provided medication within 48 hours of prescription given to ADAP Assistance provider

AIDS Pharmaceutical Assistance (local)

Includes local pharmacy assistance programs implemented by Part A or Part B Grantees to provide HIV/AIDS medications to clients. This assistance can be funded with Part A grant funds and/or Part B base award funds. Local pharmacy assistance programs are not funded with ADAP earmark funding. The lowest reimbursement rate available must be applied to the purchase of any medications with Part A funds (e.g. Medicaid, Federal 340b Program, or similar program). Short-term medication payments must be carefully monitored to assure limited amounts, limited use, and for limited periods of time.
