

System-Level Outcomes:

- (1) Reduce Late to Care entry into Ambulatory Outpatient Medical Care
- (2) Determine baseline of newly diagnosed clients through Ryan White contracted providers
- (3) Ensure existence of HIV-specific Quality Management program
- (4) Measure aggregate performance of HAB HIV measures among NH-FF EMA, Lead Agencies & individual contracted providers
- (5) Measure, then improve, technically ‘out of care’ and ‘erratically in care’

<i>Standard of Care</i>	<i>Outcome Measure</i>	<i>Numerator</i>	<i>Denominator</i>	<i>Data Source</i>
<p>1. Disease status at time of entry into care Effort to measure CDC-defined ‘late to care’ (HRSA:HAB-# of clients meeting CDC AIDS diagnostic criteria within 30 days of entry into Ryan White funded AOMC) (EMA: # of clients with CDC AIDS diagnosis at or within first year of entry into AOMC)</p>	<p>1. New opportunistic infections in year 2. Rate of HIV-related hospitalizations in year 3. Mortality rates</p>	Number of clients with initial AIDS diagnosis or converting to AIDS diagnosis within first year of entry into AOMC	Number clients entering AOMC within year	<ul style="list-style-type: none"> • CAREWare. • Annual chart review
<p>2. Positive HIV test with client receipt of results in year Effort to determine rate of diagnostic HIV testing and opt-out health screening as routine clinical care in all health care settings.</p>	<p>1. Rate of AIDS diagnosis of patients entering care in year 2. Rate of HIV incidence in year</p>	Number of individuals tested within healthcare network of Ryan White providers who test positive for HIV in year and are given results	Number of individuals within healthcare network of Ryan White contracted providers tested for HIV within year	<ul style="list-style-type: none"> • Ryan White Data Report (Section 4, Items 38 & 40) • Electronic databases <ul style="list-style-type: none"> ○ PEMS ○ LabTracker ○ EMR
<p>3. Quality Management Program Existence of HIV-specific quality management program among contracted providers.</p>	Contracted providers with HIV-specific Quality Management plans	Number of contracted providers with HIV-specific QM plan	Number of contracted providers	<ul style="list-style-type: none"> • Annual program site visit
<p>4. Rate of Achievement of aggregate or selected HRSA: HAB HIV performance measures Aggregate achievement of HAB HIV performance measures</p>	<p>1. Determination of how well system is doing on key or all measures 2. Determination of Lead Agency specific performance on key or all measures. 3. Determination of individual contracted provider performance on key HAB HIV measures</p>	<p>1. Number score of HAB HIV measures for EMA 2. Number score of HAB HIV measures for Lead Agencies 3. Number score of HAB HIV measures for individual contracted providers.</p>	Total possible score	<ul style="list-style-type: none"> • Annual chart audit
<p>5. Care Status of all individuals accessing Ryan White services Measurement of care status and aggressive efforts to link all individuals using Ryan White Part A program while maintaining open access to care.</p>	Active care status in EMA with determination of services selectively accessed by clients not ‘technically’ in care.	<p>1. Number of EMA clients technically out of care 2. Number of EMA clients erratically in care (‘danger of OOC’)</p>	<p>1. Number of EMA clients 2. Number of EMA clients</p>	<ul style="list-style-type: none"> • Annual chart audit
